

LETTER OF APPRECIATION

CSET and the University of Hawaii research team are grateful for the support and collaboration of ***Charley's Taxi and Limousine*** and its president Dale Evans. Together we are advancing traffic safety in Hawaii by training and evaluating professional drivers on the sophisticated, realistic driving simulator of ***Charley's Taxi and Limousine***.

The first year of collaboration has resulted in the completion of a Master's Thesis in Civil Engineering and international publications and presentations as follows.

Miah, Mintu M. and Panos D. Prevedouros, **Effects of Reading Text While Driving: Analysis of 200 Honolulu Taxi Drivers on a Simulator**, Paper 19-00176, 98th Annual Meeting of the Transportation Research Board, Washington, D.C., 2019.

Mintu Miah, **Effects of Reading Text while Driving: Analysis of 200 Honolulu Taxi Drivers on a VS500m Simulator**, M.S. Thesis, Department of Civil and Environmental Engineering, University of Hawaii at Manoa, November 2018.

Prevedouros, Panos D. **Driver Distraction: Perception Survey and Driving Simulation Results**, presentation at 2018 CICTP conference sponsored by the American Society of Civil Engineers and the Chinese Overseas Transportation Association, Beijing, July 2018.

Signed on December 18, 2018.
